

CEPREMAP / DBNOMICS

# Macroeconomic Outlook - January 2023

## DBnomics

- All data presented in the forthcoming slides are extracted from DBnomics (<https://db.nomics.world/>), an open-sourced databank created at CEPREMAP, and will be automatically updated every Friday at 2:00pm
- The project has been financed by generous grants from Banque de France, AFD, DG Trésor, France Stratégie and OECD
- The executive director of the DBnomics project is Christophe Benz
- The comments on the slides have been written by Daniel Cohen and Armand Dubois at CEPREMAP
- Links to the DBnomics data are available in the Appendix
- All materials presented here can be freely used with proper acknowledgment

## Executive summary

- 2022 is the year when inflation reached record high levels since 1981.
- 2023 is announced as a year of low and potentially negative growth both in the US and in the EZ.
- In response to inflationary pressure, monetary policy has been tightened up to levels unheard of for the last 20 years.
- Squeezing liquidity may result in severe financial strains, reversing the previous decade of easy money.
- From a textbook point of view, in the case of a supply shock, only a rise of unemployment can calm down wage inflation.
- The sheer threat of a recession has reduced the price of energy, potentially cooling down inflationary pressures worldwide, subject to further OPEC decisions.
- The discrepancy between the tightening pace in the US and in the Euro Area has led to an appreciation of the USD against the EUR. The expectation that US inflation may peak before the EZ could reverse this trend next year.

## I Growth and inflation in selected G20 countries

## **A    The growth slowdown**

## Growth in advanced economies

Most of the major Advanced Economies have started a significant growth slowdown, although 2022 European growth has proved to be more resilient than expected

Yearly GDP growth rate (YoY % change)

Weekly growth tracker in Emerging Economies (YoY % change) – Since Jan. 2021

# Government debts and deficits have reached a new plateau in the G5 countries<sup>1</sup>

Fiscal accounts were deteriorated by Covid-19 policy responses with inflation a moderating factor on the evolution of debt

General Government debt (% of GDP) – Since 2001

General Government deficit (% of GDP) – Since 2001

# Consumer confidence indicators are falling in the G4 countries<sup>1</sup>

Business confidence, however, while below post-Covid peaks, remains at pre-crisis level

Consumer confidence indicator – Since Jan. 2020

Business confidence indicator – Since Jan. 2020

## **B The seeds of inflation**

## Energy prices have sharply increased over the last 2 years... - (1/2)

Post Covid recovery has raised commodity prices, even prior to the Ukrainian invasion

**Oil prices in historical perspective (USD per barrel)**

**Natural Gas (Dutch TTF) prices in historical perspective (€/MWh) – Feb. 23**

**Copper prices in historical perspective (USD/tonne)**

**CBOT Wheat (USD/Bushel)**

## ...but may have already peaked - (2/2)

Ukrainian invasion lifted up prices, but fear of recession are cooling off pressure. European gas prices below pre-war levels.

**Oil prices in historical perspective (USD per barrel)**

**Natural Gas (Dutch TTF) prices in historical perspective (€/MWh) – Feb. 23**

**Copper prices in historical perspective (USD/tonne)**

**CBOT Wheat (USD/Bushel)**

# Supply chain disruptions are easing up significantly

Transportation costs, while still high in historical perspective, are rapidly returning to normal

**% of EU business reporting shortages of materials and equipment in the construction industry as a limiting production factor**

**Shipping Container Index (based on spot rate for 40 feet containers)**

# Labor markets remain tight...

The vacancy/unemployment ratio still at record high levels

**Beveridge curve - USA (Q1-17 – Q2-22), Quarterly**

**Beveridge curve - France (Q1-17 – Q2-22), Quarterly**

**Beveridge curve – Euro Area (Q1-17 – Q2-22), Quarterly**

**Beveridge curve - Germany (Q1-17 – Q2-22), Quarterly**

## ... resulting in rising labor costs, especially in the US

The verdict on EZ wage inflation still open

Wage growth tracker (nominal wage growth of individuals) – US (Monthly)

— 3-months moving average - Weighted overall

Indicator of negotiated wages<sup>1</sup> in the Euro Area (Quarterly)

— Euro Area - Indicator of negotiated wages — France - Salaire mensuel de base (SMB)

## **C    Inflation unbound**

## In 2022, inflation have reached record high levels

Latest data in the US and in Europe shows that inflation has peaked in both regions, although at a higher level in the Eurozone. Core inflation, however, is still higher in the US and the UK than in EZ

CPI and core inflation in advanced economies (YoY % change)

| Monthly Year-on-Year inflation rates (%) - 2022 |       |       |       |     |     |     |      |     |      |      |      |     |

Quarterly implied GDP deflator – Since Q1-1992

## II Monetary policy

**A In the US**

## Monetary Policy Decisions from the Fed (1/2)

Fed has raised rates by 50 bps and signaled its intention to keep squeezing the US economy, after a massive tightening of its monetary policy during the past 4 months

PCE Inflation Projections as of December 2022 (%)

### Key considerations

- The target range of the federal fund rates was lifted from 3.75%-4.00% to 4.25%-4.50% on December 14<sup>th</sup>
- “The Committee anticipates that ongoing increases in the target range will be appropriate in order to attain a stance of monetary policy that is sufficiently restrictive to return inflation to 2 percent over time”
- This increase follows a step down in the pace of tightening that marked a 4-month in a row 75 bps increase
- The next meeting will be on the January 31<sup>st</sup> and February 1<sup>st</sup>

Federal Reserve economic projections as of 14 December 2022

| Indicator          | 2022 | 2023 | 2024 | 2025 |
|--------------------|------|------|------|------|
| Change in real GDP | 0.5  | 0.5  | 1.6  | 1.8  |
| Unemployment rate  | 3.7  | 4.6  | 4.6  | 4.5  |
| Inflation          | 5.6  | 3.1  | 2.5  | 2.1  |
| Federal funds rate | 4.4  | 5.1  | 4.1  | 3.1  |

“It will take substantially more evidence to give confidence that inflation is on a sustained downward path”

JEROME POWELL, PRESS CONFERENCE, 14 DECEMBER 2022

Source: Fed as of 14/12/2022

# Monetary Policy Decisions from the Fed (2/2)

The Federal Reserve’s so-called dot plot shows the median year-end projection for the federal fund rates. The estimate for the end of 2023 is 5.3% implying an additional 100 bps increase

FOMC participants’ assessments of appropriate monetary policy: Midpoint of target range or target level for the federal funds rate as of 14 December

# In the US, positive inflation news has brought down nominal rates well below the 4.0% peak

Latest Fed comments, however, brought rates up again. Expected real rates have turned positive in the longer run as forward rates were lifted-up dramatically

### 10-Y Nominal yield – US

### Inflation Expectations – US (%)

### Forward Rates on 10-Year U.S. Treasuries (%)

# The US yield curve is inverted, harbinger of a recession

Prior similar episodes include 2008, 2002, 1992, 1983 and 1981

## Yield curve - US

## **B In the Euro Area**

# The ECB has raised its interest rates by 50 bps in December after two increases of 75-bps in October and September

Christine Lagarde has admitted eurozone price pressures may rise again in early 2023, reflecting Europe's stickier inflation problem

CPI and core inflation expectations & projections as of July 2022 (%)

## Key considerations

- The Governing Council decided to raise the three key ECB interest rates by 50 basis points, following a 75-bps hike in October for the second time in a row
- Looking ahead, ECB staff have significantly revised in December their inflation projections up and inflation is now expected to average 8.4% in 2022, 6.3% in 2023, 3.4% in 2024 and 2.4% in 2025
- The interest rate on the main refinancing operations has been lifted-up to 2.50%
- The next meeting of the ECB is set on February 2<sup>nd</sup>

ECB economic projections as of 14 December 2022

| Indicator          | 2022 | 2023 | 2024 | 2025 |
|--------------------|------|------|------|------|
| Change in real GDP | 3.4  | 0.5  | 1.9  | 1.8  |
| Unemployment rate  | 6.7  | 6.9  | 6.8  | 6.6  |
| Inflation          | 8.4  | 6.3  | 3.4  | 2.3  |

“I believe that in the euro area the neutral rate can be estimated as below or close to 2% in nominal terms, and we could be there by the end of the year”

FRANÇOIS VILLEROY DE GALHAU, IMF, WASHINGTON, 14 SEPTEMBER

Source: ECB as of 14/12/2022

# In the Eurozone, the German bund has peaked up again after Christine Lagarde's hawkish message on next year monetary tightening

Expected real rates near zero in the longer run

## 10-Y Nominal yield – German Bund

## Inflation Expectations<sup>1</sup> - Germany (%)

## Forward Rates on 10-Year German Bund (%)

## The German yield curve is getting (moderately) inverted for the first time since 2008, reflecting fear of recession/sluggish growth in 2023

Yield curve – Germany

# The Euro has weakened for most of the year 2022, staging a recovery in the final months

Latest US and Europe data lifted-up the euro as the prospect of monetary tightening in the US is easing off, while the ECB remains circumspect on inflation data

Nominal Foreign exchange rate in historical perspective – Since Jan. 2020

Nominal Foreign exchange rate in historical perspective – Since Jan. 2022

“The level of the euro matters significantly for imported inflation, [...]. A euro that is too weak would go against our price stability objective”

BANQUE DE FRANCE VILLEROY DE GALHAU, 06 MAY

### **III Impact on yields and spreads**

## In Europe, sovereign yields are mounting ...

In response to the ECB hawkish message

Italian, Greek and French 10-Y yields – Since Jan. 2021

## ... generating higher spreads in European countries

Greek and Italian spreads reach a higher plateau

Italian, Greek and French spreads over 10Y German bund – Since Jan. 2021

In bps

## High yield corporate bond spreads have also risen

Spreads for corporate bonds<sup>1</sup> in the US and in Europe have increased since the beginning of 2022 and are now c. 100-200 bps above their pre Covid-19 crisis level

High yield corporate bond spreads – Since 2000

High yield corporate bond spreads – Since 2022

## **IV    Impact on stock markets**

## Stock market prices have been falling since the beginning of 2022

After a sharp rebound, especially in Europe, global stocks tumbled after central banks raised interest rates, rebounded when inflation peaked and fell again following hawkish comments of central banks

Nasdaq Composite, S&P 500 and Eurostoxx 50 indices – Jan. 2022 = 100

## Volatility on US financial markets are (moderately) edging up

VIX index – Since 2000

VIX index – Since 2020

## ... while financial stress indicators moved up to high plateaus

But easing off since November especially in Europe

**Composite Indicator of Systemic Stress (daily) – Since Jan. 1980**

**Composite Indicator of Systemic Stress (daily) – Since Jan. 2020**

# US Shiller Cyclically Adjusted Price to Earnings ratio (CAPE ratio)<sup>1</sup>

Shiller CAPE ratio remains at record high level in historical perspective

Cyclically Adjusted Price Earnings ratio – Since 1900

Cyclically Adjusted Price Earnings ratio – Since 2020

# Shiller excess CAPE return index remains at moderate level in the US

Trending down after the peak due to the Russian invasion

Excess Cyclically Adjusted Price Earnings return – Since 1900

Excess Cyclically Adjusted Price Earnings return – Since 2020

## Shiller CAPE ratio in Europe

Shiller CAPE ratio is still close to its pre-Covid level and to its historical average

Cyclically Adjusted Price Earnings ratio – Since 1982

Cyclically Adjusted Price Earnings ratio – Since 2020

## Shiller excess CAPE return index in the Euro Area back to historical average

Excess Cyclically Adjusted Price Earnings return – Since 2006

Excess Cyclically Adjusted Price Earnings return – Since 2020
